

Decision 05-02-030 February 22, 2005

**BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA**

Order Instituting Rulemaking on Policies and Practices for Advanced Metering, Demand Response, and Dynamic Pricing.

Rulemaking 02-06-001  
(Filed June 6, 2002)

**ORDER CORRECTING ERRORS  
IN DECISION 05-01-056**

It has come to our attention that three columns of information were inadvertently omitted from the Summary of Adopted Utility Demand Response Programs and Goals for 2005- SDG&E set forth on pages 57 and 58 of D.05-01-056. While the text and the tables for Pacific Gas and Electric Company and Southern California Edison Company contained columns entitled 2003-2004 Carryover Allocation, Total Net Requested, and Estimated Summer 2005 Total Potential MW, these columns were omitted for San Diego Gas & Electric Company (SDG&E) due to a clerical oversight. We include the complete table as an attachment to this order correcting error.

In addition, the table inadvertently omitted \$1.2 million in funding requested by SDG&E for its residential and small commercial 20/20 program, despite the footnote stating that we were adopting the proposed funding level from its December 1, 2004 filing. The table did not include \$800,000 in the Customer Incentives column for SDG&E's "C&I 20/20 Program" to reflect direct access customer participation that was adopted. We correct these errors in the table attached.

Therefore, under the authority of Resolution A-4661,  
**IT IS ORDERED** that Decision 05-01-056 is corrected to incorporate the  
changes described herein.

This order is effective today.

Dated February 22, 2005, at San Francisco, California.
